

NEW SOUTH WALES.

MONTHLY SUMMARY OF BUSINESS STATISTICS.

No. 36. APRIL 24, 1934.

Issued by T. Waites, Government Statistician.

INDEX OF WHOLESALE PRICES (SYDNEY).

Average for year 1911 = 100.

All prices are in Australian currency. The indexes for recent months are shown in table 25 on page 11 of this summary. The footnotes to that table apply also to this graph.

The favourable seasonal conditions continue. Heavy falls in the first half of April compensated for the sparse rainfall during March.

2. WOOL.

It is anticipated that the total production of wool in New South Wales for 1933-34 will be approximately 470,000,000 lb., as compared with a record total of 532,080,000 lb. in 1932-33.

The selling season in Sydney has concluded, except for clearing-up sales in May and June.

The course of wool prices is shown in Table 25. The average price realised for greasy wool sold at Sydney auctions in the nine months ended March, 1934, was 16-1d. per lb., as compared with 8-6d. per lb. in the corresponding period of 1933.

3. WHEAT.

Final returns of the crop harvested in the State in 1932-33 show a production of 78,870,000 bushels. The estimated area sown with wheat for grain and hay in New South Wales in the season 1933-34 was 4,838,000 acres. On 14th April, 1934, the quantity of wheat grain stored in silos and on railway premises was 31,094,000 bushels. Of this quantity 9,259,000 bushels were on sites in the Metropolitan Area.

The course of wheat prices is shown in Table 25. Comparatively small sales have been effected to date on account of the low prices offering. Continued lag in exports is anticipated in the immediate future.

4. BUTTER.

The production of butter in 1932-33 was a record, which appears certain to be exceeded in the current season. Production in the eight months ended February, 1934, was 16 per cent. greater than in the corresponding period of 1932-33.

The course of butter prices is shown in Table 25. After a collapse extending from September, 1932, to April, 1933, the London butter market revived temporarily, but collapsed again in October, and weakened until December, 1933. Prices have since fluctuated at a very low level. Export sales parity (Sydney) on 12th April, 1934, was 73s. per cwt. compared with 71s. per cwt. a year previously.

5. COAL.

The quantity of coal raised in 1933 was 7,118,000 tons compared with 6,784,000 tons in 1932 and 6,432,000 tons in 1931.

* Excluding bullion and specie.

The values of imports represent the cost f.o.b. port of export plus 10 per cent., and are recorded in English currency. The values of exports are the values in the principal markets of New South Wales, less bonuses on butter, &c., and are recorded in Australian currency. The respective equivalent values in Australian and British currencies shown above are estimated.

A considerable number of commodities was exempt from tax as from 1st September, 1932, with further exemptions as from 26th October, 1933. The number of wholesalers dealing only in exempt goods and not required to supply returns, therefore tends to increase.

* State Government banking transactions suspended. Index not ascertainable. † Exclusive of certain abnormal Government transactions.

Following on a special research, the index was revised throughout in order to eliminate the effects of Treasury Bill and other special transactions on behalf of Governments and the effects of bank amalgamations. The amounts of clearings shown are the recorded totals less Treasury Bill transactions only.

The index may be regarded as an approximate measure of changes in the volume of business transactions settled by cheques provided it is considered in conjunction with changes in price levels. The index represents the ratio of each month's clearings to the average for the month concerned during the five years 1926–1930. This average is represented by 100 each month. Seasonal fluctuations have thus been eliminated. Casual fluctuations in monthly index numbers have been smoothed out by taking a three months' moving average, that is, the index shown above for each month is the average of the actual index of that month and the preceding two months. It may be compared vertically or horizontally.

No adjustment has been made for normal growth or change of price levels.

1934	1,843,812	1,302,177	4,920,543	4,083,663

* Including new mortgages and renewals as registered.

The above comparison is affected by a decline in property values. Figures for individual months are shown in Table 50 of the Statistical Bulletin of New South Wales for December Quarter, 1933.

NOTE.—Mortgages and liens in some instances secure fluctuating advances, the amount of which is not recorded in the legal instruments. The amounts shown relate substantially to mortgages of fixed amounts for fixed periods, and exclude fluctuating advances (such as overdrafts) secured by mortgage. Mortgages providing collateral security of subsisting mortgages are included.

23. STOCK EXCHANGE INDEX (SYDNEY).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and the group averages are the means of the average monthly prices per £ of paid-up capital. The aggregate index is the average for the whole of the shares included in the groups with the addition of 24 miscellaneous shares. It represents the ratio of the average prices of ordinary shares to their par values.

Par Value of Shares = 100.
